PROFESSIONAL SUMMARY

Frontend Developer with 3+ years of experience building responsive web applications for SaaS and e-commerce products. Skilled in React, TypeScript, modern CSS, REST API integration, and cross-functional collaboration. Focused on accessible interfaces, maintainable code, and measurable improvements to user experience.

PROFESSIONAL EXPERIENCE

Frontend Developer | Northstar Digital, Belgrade | Mar 2023 – Present

- Developed and maintained customer-facing React and TypeScript features used across a multi-product web platform.
- Reduced median page-load time by 22% by optimizing bundle size, image loading, and component rendering; measured through internal performance dashboards.
- Partnered with designers and QA engineers to deliver accessible UI components and improve consistency across product screens.
- Introduced reusable form components and validation patterns, reducing duplicated frontend code across three workflows.

Junior Web Developer | BrightPath Studio, Remote | Jun 2021 – Feb 2023

- Built responsive landing pages and internal tools with JavaScript, HTML, CSS, and React.
- Integrated REST APIs and collaborated with backend developers to troubleshoot data-loading and authentication issues.
- Improved delivery reliability by documenting common UI patterns and contributing to code reviews and regression testing.

SELECTED PROJECTS

TaskFlow — Personal productivity web app | React, TypeScript, Firebase

- Created a task management app with authentication, project boards, filters, and mobile-friendly layouts.
- Implemented reusable components, basic automated tests, and deployment through a continuous integration workflow.

Shopfront UI — E-commerce interface prototype | Next.js, CSS

- Built a product listing and checkout prototype with keyboard-friendly navigation and responsive layouts.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript (ES6+), HTML5, CSS3, Next.js
Tools: Git, GitHub, Figma, Chrome DevTools, Jira, Vite
Practices: Responsive design, accessibility (WCAG fundamentals), REST APIs, unit testing
